# Our Data Promise to You!

**The Regional Food Bank of Oklahoma and our Partner Agencies (*your local food pantry*) are working together to improve the intake processes by using Link2Feed software. All information will be stored electronically and securely in the Link2Feed database.**

**What is Link2Feed?** Link2Feed is a secure online database to manage information regarding neighbors who are served within the network of Regional Food Bank.

**How Does it Help Me?** This online system creates a faster intake during future visits.

**How Will it Be Used?** The collected information helps your food pantry and the Regional Food Bank share accurate information for a clearer understanding of hunger in our community. The more information we have, the stronger our message for funding community resources. We respect your right to privacy and hope you'll tell us about yourself.

❖ **We will keep your information safe and secure!**
   o We will not share your personal and individual information. All information gathered in Link2Feed will only be shared in an aggregate format.
   o Link2Feed has a high security standard, just like the banking industry.

❖ **We will treat you and your information with dignity and respect!**
   o Your profile ID number is unique to you in Link2Feed and can be used at multiple food pantries.
   o Food assistance provided by each pantry partner can **only** be viewed by the pantry partner that provided the assistance.

❖ **Who can access my information?**
   o Only approved people can log into and access the system. Your pantry and the Regional Food Bank can run aggregate reports to look for trends and learn more about the community. Individuals are **not** identified in reports.
